Aspectos sociais, econômicos e culturais em ecossistemas urbanos

Complexos ecossistemas urbanos

Fig. 1 Outstanding questions for urban ecology (1–4) in the context of environmental, individual, and population variation. Some representative common animals found in cities around the globe are pictured. Environmental variation can affect individual and population-level variation. Individual variation affects individual fitness which then can lead to changes at the population-level.

Quais fatores ecológicos e socioeconômicos produzem mudanças genéticas e fenotípicas em organismos urbanos e como esses fatores interagem entre si?

Impactos diretos e indiretos sobre os ecossistemas

Fig. 2 Conceptual framework of multi-scalar social-ecological interactions of residential landscapes. *Arrows* represent interactions between framework components

Cook, et al. (2011)

Cook, *et al.* (2011)

- **Escala domiciliar/familiar**
 - Residentes - Decisões
 - Vantagens socioeconômicas
 - Estilo de vida
 - Educação
- **Escala de vizinhança**
 - Comunidade
 - Normas Sociais
 - Costumes
- **Escala municipal/regional**
 - Política
 - Esfera governamental
 - Interesses econômicos

Cidades são complexos sistemas **socioecológicos**

Fatores que determinam as tomadas de **decisões** humanas

Decisões

Individual = Renda individual, espaço de ação limitado

Coletivo = Imposições dos grupos sociais e cultural

Político = Interesses, demandas e decisões políticas

- Sociais
- Econômicos
- Culturais

JOURNAL ARTICLE

Managing urban ecosystems for goods and services

Kevin J. Gaston, María L. Ávila-Jiménez and Jill L. Edmondson

Journal of Applied Ecology

Vol. 50, No. 4 (August 2013), pp. 830-840

Landscape Ecol (2016) 31:401–413
DOI 10.1007/s10980-015-0256-7

RESEARCH ARTICLE

Different social drivers, including perceptions of urban wildlife, explain the ecological resources in residential landscapes

J. Amy Belaire · Lynne M. Westphal · Emily S. Minor

Urban Ecosyst (2012) 15:19–52
DOI 10.1007/s11252-011-0197-0

Residential landscapes as social-ecological systems: a synthesis of multi-scalar interactions between people and their home environment

Elizabeth M. Cook · Sharon J. Hall · Kelli L. Larson

Individual

p.ex.

Renda → + Riqueza vegetal

- Manejo dos quintais e varandas
- Heterogeneidade ambiental
- Áreas maiores
- Percepção social (grupos)
- Subúrbios afastados

-  **Biodiversidade**

Belaire, *et al.* (2016)

Coletivo

Urban Ecosyst (2012) 15:19–52
DOI 10.1007/s11252-011-0197-0

Residential landscapes as social-ecological systems: a synthesis of multi-scalar interactions between people and their home environment

Elizabeth M. Cook • Sharon J. Hall • Kelli L. Larson

- Indivíduo parte do **coletivo**
- Cultural – Não mais somente adaptativo
- Vegetação exótica/ Introdução de espécies
- Tomada de decisões políticas
- Formas de consumo

- **Conservação e apreço pela natureza como algo cultural**
- **Transmitir para futuras gerações**

SYMPOSIUM INTRODUCTION

A New Framework for Urban Ecology: An Integration of Proximate and Ultimate Responses to Anthropogenic Change

Jenny Q. Ouyang,^{1,*} Caroline Isaksson,[†] Chloé Schmidt,[‡] Pierce Hutton,[§] Frances Bonier[¶] and Davide Dominoni^{||,#}

- **Cidades mais ricas/de países mais ricos**
- **Mais parques**
- **Áreas verdes**

- Maior disponibilidade de alimento
- Maior disponibilidade de locais para nidificação

Político

- Sofre influência do coletivo
- **Interesses, demandas e decisões** políticas

- **Atua em escalas mais amplas**
 - **Municípios**
 - **Estados**
 - **País**

- **Capitalismo**

Ecological Economics 11 (1994) 169–178

ECOLOGICAL
ECONOMICS

Inequality as a cause of environmental degradation

James K. Boyce

Department of Economics, University of Massachusetts, Amherst, MA 01003, USA

Received 15 March 1993; accepted 15 February 1994

James K. Boyce

- Balanço entre **vencedores** e **perdedores**
- Desigualdade econômica e social
- **Desigualdade ambiental**

As pessoas precisam ter consciência dos prejuízos que a degradação ambiental causa a suas vidas. O que os poderosos, os “vencedores” segundo o sistema de Boyce deveriam ressarcir os “perdedores” pelos danos ambientais causados, uma vez que estes primeiros não são donos dos ecossistemas e seus serviços.

Ecosystem Services
Volume 40, December 2019, 101030

Changing use of ecosystem services along a rural-urban continuum in the Indian Trans-Himalayas

Ranjini Murali ^{a, b, c} ✉, Kulbushansingh Suryawanshi ^{a, b}, Stephen Redpath ^{a, d}, Harini Nagendra ^e, Charudutt Mishra ^{a, b}

Highlights

- Local ES use decreased along a gradient of urbanization.
- Imported ES use increased along a gradient of urbanization.
- Local ES use increased with income only in small urban centres.
- Use of imported ES increased with income in all settlement types.
- Changes caused due to urbanization start early in the rural-urban continuum.

- **Redução** do uso dos serviços ecossistêmicos
- Aumento do uso de serviços *importados*
- Em cidades a **renda** foi um fator determinante para a obtenção e uso dos SE
